2020: FEATURED PRODUCTS

CREATE A YACHT AS  
INDIVIDUAL AS YOU ARE

The products contained here are a selection of those most requested by Princess owners. They help enhance your own unique yacht environment and create something especially built for your needs. Reassuringly, any products you choose will be installed by Princess-trained craftsmen and engineers.

There are virtually no limitations to what we can do, so if what you have in mind isn't listed amongst these pages, we'll be delighted to discuss your ideas with you.

# MONITOR YOUR YACHT THE SMART WAY

From your mobile phone, tablet or computer the Siren Marine monitor allows you to stay connected with your yacht remotely via a simple mobile app and gives you complete peace of mind when away from the boat.

It has the ability to monitor battery voltage, bilge alarms, shore power connection, unauthorised access and incorporates a GPS tracker with geofence.

## SIREN MARINE MTC DEVICE SM-MTC-A

The Siren Marine MTC is ushering in the future of the Connected Boat™. Now offering a brand new easy-to-use app, global 3G connectivity, the choice of wired and wireless sensors, and more inputs than ever before, the MTC is the most versatile and reliable system on the market.

- Monitor bilge level, high water, temperature, and engines to make sure systems are functioning properly
- Track GPS position and set geo-fences to know where your boat is at all times
- Control your lights, A/C, and countless other systems from anywhere
- Secure your boat by connecting to entry alarms and motion sensors

## IMPROVE YOUR RIDE

We provide advanced stabilising systems from Humphree, one of the leaders in interceptor and fin design and innovation - so you can enjoy a steady ride, whatever the sea conditions.

### INTERCEPTORS

Humphree's patented award-winning design of the interceptor is like no other, providing active stabilisation, customisable to the size of your yacht.

- Compact and robust, making it less vulnerable to impacts
- Features an adjustable blade which cuts through the water vertically
- Corrosion resistant and light weight
- Innovative design reduces resistance in the water, adds speed and improves acceleration, with quick and easy control from the helm

### FINS

The new electric fin stabilising system from Humphree brings a cost-saving and powerful solution to the marine market. This new state of the art system will give you the advantage when handling the high seas.

- 24V DC powered, meaning the system can be operated without a genset engine running while underway
- System design reduces noise, fuel and wear
- Control roll and pitch motions, improving the ride and comfort for crew and passengers at rest and under way

# COMFORT, GUARANTEED

From relaxing at anchor to navigating the stormy seas, MC Quick Gyro stabilisers can reduce your boat roll by up to 95%, and its innovative user-friendly technology gives you complete control.

- Versatile design suits any size yacht with no installation limits
- High performance, reliable safety and protection
- Equipped with Quick electric motors benefiting from low noise emission
- Smart, compact design
- Easy to use MC Touch remote control and mobile app provides comprehensive reports on performance and control of the stabilisers

- SMART, COMPACT DESIGN**: An icon showing a small rectangular unit with four arrows pointing towards it from the corners, indicating its compact size.
- EASY INSTALLATION**: An icon showing a unit being lowered into a hull structure, with arrows indicating the installation points.
- FAST SPOOL UP TO RATED RPM**: An icon of a unit with a clock face and a checkmark, signifying speed and reliability.
- ROLL REDUCTION UP TO 95%**: An icon of a unit with a circle containing '95%' and a boat's hull below it, representing the roll reduction capability.
- LOW NOISE**: An icon of a unit with a speaker symbol and sound waves, indicating low noise levels.
- REDUCED MAINTENANCE**: An icon of a unit with a crossed-out wrench and screwdriver, signifying low maintenance requirements.
- HORIZONTAL AXIS ROTATION LESS STRESS ON THE BEARINGS**: An icon of a unit with a horizontal axis and a plus sign, indicating the rotation direction.

DOCKMATE

## BE IN PERFECT CONTROL EVERY TIME

We offer the most technologically advanced docking systems so you can stay in control of your boat with an extra pair of hands on board - even away from the helm.

### DOCKMATE SYSTEM

All boats with electronic engine controls can be equipped with the Dockmate system, regardless of the length or type of boat.

- Waterproof, floating transmitters with a clear, simple layout
- Easy, accurate, safe and reliable operation
- Control of the engines with optional controls for bow thruster, stern thruster and windlass
- Dockmate signal can reach up to 50 meters
- Visual and audible status indication and warning
- Automatic shutdown of the transmitter after 30 minutes of non-use

### DOCKMATE TWIST

Docking made easy - the Dockmate Twist offers a wireless extension of your boat's controls with the exact same feeling and response time.

- Manoeuvre your boat from any position on board
- Control 1 or 2 engines and thrusters with the proportional joystick
- Fully calibrated and configured to adapt to your boat's behaviour
- 360 degree control

If your boat is equipped with Volvo Penta IPS or any Volvo joystick, upgrade to the Dockmate Twist Vector.

- Operates Dynamic Positioning system when installed
- Control of POD system as well as engines, thrusters and anchor winches or windlasses

## CABLE MANAGEMENT MADE EFFORTLESS

We work with Glendinning, the leading manufacturer of onboard solutions to make those mundane tasks easier – and give you more time to do the things that really matter.

### GLENDINNING HOSEMASTER

With its compact storage and design, the Glendinning Hosemaster retrieves and stores your water hose with ease.

- Manual pull out, motorized retraction & storage
- “Zero-effort” pull out technology
- Compact design able to fit in small areas

### GLENDINNING CABLEMASTER

Easy to install and with compact storage, the Glendinning Cablemaster makes it simple to retract your big, heavy shore power cable from yacht to dockside with just a push of a button.

- Motorised cable retraction
- Cord reels for cable ampacity between 16 and 63 amps, up to 4 conductors, and up to 75 feet of cable length

## OPEN UP A WORLD OF POSSIBILITIES

Whatever you need a tender for, we have a huge variety that will open up a whole world of new activities and destinations to you. From taking one out exploring, to towing toys or simply running back and forth from shore – our specialist team can help you find the right tender and make sure that you can safely launch and recover it yourself with ease.

### WILLIAMS SPORTJET 395

This beautifully designed tender is made to perform, in every way. The reliable, powerful engine gives you lightning quick acceleration, while the clever social seating configuration gets passengers even closer to the action at the helm.

Plus, it can seat up to six adults – extremely impressive for a tender of this length.

The increased tube diameter also improves stability, providing a dryer ride in chop, giving you greater freedom to go further, and do more. Enjoy endless memorable days of fun, relaxation and sporting action – whatever the conditions.

### WILLIAMS SPORTJET 345

This boat gives those with smaller yachts the opportunity to truly experience these high-performance, super-fun tenders. Designed to fit on the back of 16m+/52ft+ motor yachts, it might have a smaller length overall, but that doesn't stop it seating five adults.

The BRP Rotax engine also packs a punch, while the sports hull gives impressive stability to create an exceptional craft. Whether you're pulling a skier or going in search of unspoilt turquoise coves and deserted golden beaches – it's always a pleasure.

## WATERMAKERS

# FRESH. CLEAN. INSTANT WATER

We can enhance your onboard water supply with a simple modification that lets you enjoy a convenient, safe and hygienic solution when underway.

### DOMETIC SEAXCHANGE XTC 1200Z

The XTC automatic watermaker with full mechanical override in case of computerised failure provides up to 8,328 LPD using reverse-osmosis technology to turn seawater into freshwater.

- 2-in-1 modular or compact frame design for ease of installation
- Reliable and durable
- One touch operation with programmable logic to keep water tanks full automatically
- Computer controller with backlit display

### DOMETIC XZ SERIES COMBINATION SYSTEM

The Sea Xchange and Spot Zero XZ is a combination series for those in need of a compact, integrated solution to their onboard water system, providing reliable fresh water anywhere in the world.

- Creates spot free water from sea water in one efficient process
- Seamless, fully automated system with user friendly control
- Low noise levels and low power consumption

ULTRA ANCHOR

## SLEEP EASY

Introducing the world's number one anchor with exceptional holding power and a unique design.

- Balanced weight distribution, always landing on the sea bottom ready to dig in
- Curved anchor tip provides protection against boat movement in high knot winds
- Large side wing plates avoid release during changing wind or tide conditions

Fit your anchor with the Ultra flip swivel and hook

- A unique chain connector designed to make a big difference in your anchoring system, delivering smooth operation every time with the anchor always in the right position

## CONTACT US

We will advise on the product that's best for you, and carry out the installation - all done by our team of Princess trained engineers.

There is never a bad time to start thinking about what additions you want on board your Princess yacht. To make an appointment for an initial consultation, or simply to discuss your options, call us on +44 (0)1752 393311 or email [individual@princess.co.uk](mailto:individual@princess.co.uk)
